## EXPERIENCE

### Capital One | Senior Product Designer

July 2021 – Present

- Shipped end-to-end customer experiences supporting Capital One's acquisition of Discover, one of the bank's top 2026 strategic priorities, migrating 434k customers and \$12.2B—larger in balance than 90% of all financial institutions in the US.
- Collaborated with product, engineering, data science, research, and operations to define problem spaces, design scalable multi-platform experiences, and drive multi-team alignment within the Discover migration space.
- Partnered with AI development tools to design and deploy an internal showcase site, centralizing design documentation and scaling institutional knowledge across cross-functional product teams.
- Led redesigns of bank management flows, retaining 81.2% of deposits (\$23.5B), reducing service calls by 20% and influencing the long-term roadmap through user insights and iterative testing.
- Drove concept-to-launch for new savings tools, achieving a 486% enrollment increase and launching a first-of-its-kind ML-powered tool with ~15k active users.
- Optimized the end-to-end credit card shopping journey across web and mobile, increasing application rates by 14% and approval rates by 42%, and creating consistency between the retail bank and small business sites.

### DALI Lab | Designer, Developer & Project Manager

Sept 2019 – June 2021

- Led design and development of an immersive VR educational product from discovery through production, used in classrooms, museums, and later published on the Meta App Store.
- Defined experience vision, success metrics, and interaction models, balancing user needs, technical constraints, and partner goals in a startup-like environment.
- Facilitated critiques, ran weekly standups, and guided a cross-functional team of designers and engineers to deliver a polished experience within rapid 10-week cycles.
- Conducted iterative user research and testing to improve engagement, clarity, and learning outcomes across diverse audiences.

### SILVR: Social Interaction Lab VR | Designer & Developer

July 2020 – June 2021

- Designed and prototyped engagement-focused interaction models for a persistent multi-user XR platform funded by Facebook Reality Labs.
- Owned first-time user experience design, onboarding flows, and interaction patterns, iterating based on qualitative user feedback.
- Collaborated closely with designers and engineers to test and refine complex social and behavioral interactions in virtual environments.

## EDUCATION

### Dartmouth College

GPA: 3.69 / 4.0

**B.A.** Cognitive Science focused in Human-Computer Interaction

**Minors** Human-Centered Design & Digital Arts

### Citation of Academic Excellence

Projects in Digital Arts

AR/VR Design

3D Modeling

Drawing I

Full-Stack Web Development

## SKILLS

### UX

Figma, UserTesting.com, Lucid, Mural

### 3D

Autodesk Maya, Unity / C#, Spline

### Adobe

After Effects, Illustrator, Photoshop

### Programming Languages

React, HTML/CSS, Python, Java, C

## ACHIEVEMENTS

### Capital One TEAM Award

*Awarded to projects that advance company goals while exemplifying Capital One's core competencies*

### Hackathons

HackDartmouth V

*1<sup>st</sup> Place*

HackDartmouth VI

*Runner-up, Best Use of Google Cloud*

Dartmouth Designathon

*2<sup>nd</sup> Place*
