EXPERIENCE

Capital One | Principal Product Designer

July 2021 – Present

- Own end-to-end product design for high-impact consumer financial products across web and mobile, partnering with product, engineering, data science, and research to define strategy, rapidly iterate, and ship customer experiences at scale.
- Designed foundational experiences supporting Capital One's largest strategic initiative (the Discover integration), creating scalable interaction patterns and driving cross-team alignment while balancing speed, consistency, and long-term platform thinking.
- Shipped redesigns of core money management flows, retaining 81.2% of deposits (\$23.5B) while reducing service calls by 20%.
- Drove concept-to-launch design for new savings tools, resulting in a 486% increase in enrollment, including a first-of-its-kind ML-powered feature with ~15k active users.
- Increased credit card applications by 14% and approval rates by 42% through a redesigned end-to-end credit card shopping experience while improving usability and consistency across consumer platforms.
- Contributed to design culture through critiques, mentoring, roadmap planning, and executive storytelling, raising craft quality and systems thinking across teams.

DALI Lab | Designer, Developer & Project Manager

Sept 2019 – June 2021

- Led the product from concept to launch and shipped an immersive VR platform adopted by college classrooms, museums, and later the Meta App Store.
- Defined experience vision and interaction patterns, balancing user needs, technical constraints, and partner goals in a fast-moving, startup-like environment.
- Conducted user research, prototyped, and iterated to improve clarity, engagement, and learning outcomes across diverse user groups.
- Facilitated critiques, ran weekly standups, and guided a cross-functional team of designers and engineers through rapid 10-week build cycles.

SILVR: Social Interaction Lab VR | Designer & Developer

July 2020 – June 2021

- Designed and prototyped interaction models for a persistent, multi-user XR platform funded by Facebook Reality Labs.
- Owned first-time user experience, onboarding flows, and realistic physical interactions, iterating based on qualitative user research.
- Collaborated closely with engineers to test and refine social and behavioral interactions in an experimental virtual environment.

EDUCATION

Dartmouth College

GPA: 3.69 / 4.0

B.A. Cognitive Science focused in Human-Computer Interaction

Minors Human-Centered Design & Digital Arts

Citation of Academic Excellence

Full-Stack Web Development

Projects in Digital Arts

AR/VR Design

3D Modeling

Drawing I

SKILLS

Design

Figma
