EXPERIENCE

Capital One | Principal Product Designer

July 2021 – Present

- Owned the bank design workstream supporting the Discover acquisition (Capital One's largest strategic initiative), driving alignment with product, engineering, data, and research teams to define strategy and create scalable solutions. Wave 1 migrated 779k bank accounts and \$20.8B to Capital One: exceeding business metrics with 98% customer retention, 94% balance retention, and <1% of sessions requiring customer support.
- Led a CD account redesign that increased clarity and ease of use while empowering customers to self-manage their accounts, leading to a 20% decrease in customer service calls.
- Launched and scaled savings features to build customer financial resilience, driving a 486% increase in enrollment. Delivered a savings tool powered by machine learning with ~15K active users, making Capital One the first top 10 bank to introduce a smart savings feature.
- Spearheaded the development of an internal site documenting the project design decisions and showcasing the end-to-end customer experience, using it as an opportunity to teach Claude Code and Git workflows to fellow designers.
- Elevated design practice through critiques, mentoring, roadmap planning, and executive storytelling, strengthening craft quality and cross-functional influence.

DALI Lab | Designer, Developer & Project Manager

Sept 2019 – June 2021

- Shipped an immersive VR education game used in college classrooms, museums, and later published to the Meta App Store.
- Defined vision in a fast-moving, startup-like environment, balancing user needs, technical constraints, and partner goals.
- Guided a cross-functional team of designers and developers through rapid 10-week build cycles, facilitating critiques, weekly standups, and collaborative decision-making.

SILVR: Social Interaction Lab VR | Designer & Developer

July 2020 – June 2021

- Designed and prototyped interaction models for a persistent, multi-user XR platform funded by Facebook Reality Labs.
- Owned the first-time user experience and realistic physical interactions, collaborating closely with developers to test and refine interactions in an experimental environment.

PROJECTS

Mise

A social cooking notebook app built with Claude Code, using AI as a collaborative tool from concept to implementation. Co-created the experience with Claude, prototyping, refactoring, and optimizing the experience throughout development.

xinaicathywu.me

An interactive 3D portfolio showcasing my work in a more immersive way. Modeled custom assets in Autodesk Maya and developed the web experience in React with Three.js/React Three Fiber.

EDUCATION

Dartmouth College

B.A. in Cognitive Science focused in Human-Computer Interaction

Minor in Human-Centered Design & Digital Arts

SKILLS

Design

Figma
UserTesting
Adobe Suite
Autodesk Maya
Spline

Technical

Claude Code
React
HTML/CSS
Unity / C#
Three.js & React Three Fiber

ACHIEVEMENTS

Capital One TEAM Award

Awarded to projects that advance company goals while exemplifying Capital One's core competencies

HackDartmouth VI

Google Cloud Prize

HackDartmouth V

1st Place

Dartmouth Designathon

2nd Place
